

Artificial Intelligence Timeline

ISAAC ASIMOV'S THREE LAWS OF ROBOTICS

1942

ISAAC ASIMOV, a sci-fi writer known for the Foundation series and robot stories.

Turing Test

1950

Alan Turing proposes a test for machine intelligence.

Naming of AI - Artificial Intelligence 1955

AI was coined by John McCarthy

AI Excitement 1956-1974

Increased AI Funding

Unimate 1961

Unimate, the first Industrial Robot invented by George Devol. Patent Approved

First AI Winter 1975-1979

Limited Use of AI due leads to funding pullback on AI research.

Second AI Excitement 1980

A form of AI program called an "expert system" was adopted by corporations aka Lisp Machine

Second AI Winter 1987-1994

Market for Lisp Machine collapses and AI research funding is cut off once again.

Slow and Steady AI Research 1994

Increase in computer processing power improves AI Research speed

Roomba 2002

First Mass Production of the autonomous vacuum robot

The Fourth Industrial Revolution Present

A fundamental change in the way we live, work and relate to one another by the fusion of the digital, biological, and physical worlds.
Main Impacts
High-speed Internet, AI automation, Big data analytics, and cloud technology.
