

CHAPTER 4 KEY TERMS

WHAT IS THE #INCLUDE DIRECTIVE?

ANSWER: #INCLUDE DIRECTIVE

- Tells the computer to merge the source code from one file with the source code from another file

% - (NOT THE PERCENT SIGN!)

%

Division **Long** vs. **Short**

- Modulus (remainder) operator
- Divides two integers and returns the remainder as an integer

$$\begin{array}{r} 422 \\ 6 \overline{) 2532} \\ \underline{24} \\ 13 \\ \underline{12} \\ 12 \\ \underline{12} \\ 0 \end{array}$$

YIKES!

$$\begin{array}{r} 422 \\ 6 \overline{) 2532} \end{array}$$

EASY!

WHAT IS <<?

ANSWER: <<

- Insertion operator

WHAT IS >>?

- Extraction operator

WHAT ARE ARITHMETIC ASSIGNMENT OPERATORS?

$+$ $-$
 $\div$ $\times$

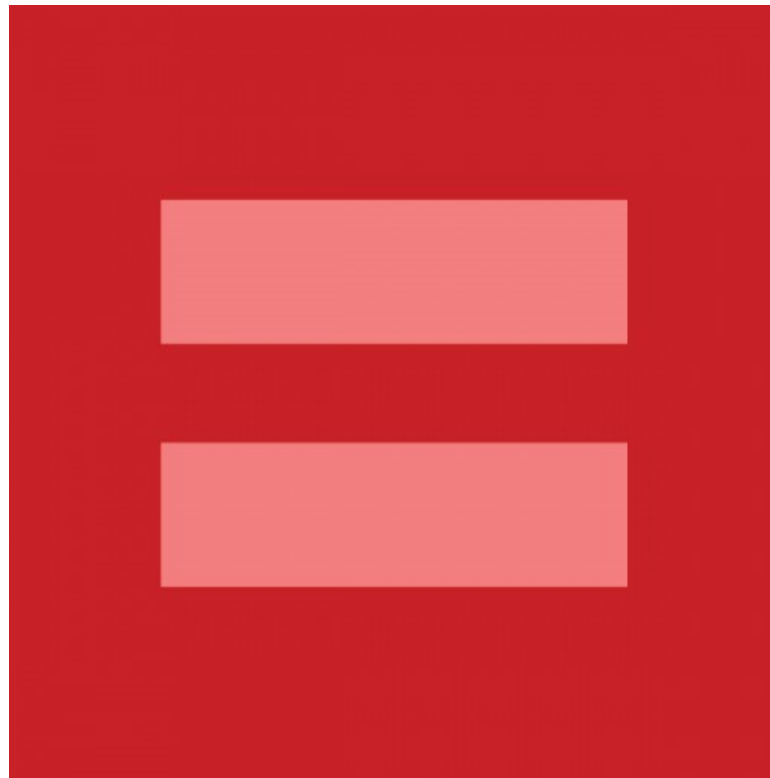

ARITHMETIC ASSIGNMENT OPERATORS

- **Have both the assignment and arithmetic operator together;**
- **Used to shorten an assignment statement**
- **`+=`**
- **`-=`**
- **`*=`**
- **`/=`**

WHAT IS AN ASSIGNMENT OPERATOR?

ANSWER: THE EQUAL SIGN

WHAT IS AN ASSIGNMENT STATEMENT?

Learn. Practice. Master.

$22 - 6 = \boxed{16}$ ✓

$9 \times 12 = \boxed{}$

$\boxed{} + 3 = 14$

SKIP QUESTION >

ANSWER: ASSIGNMENT STATEMENT

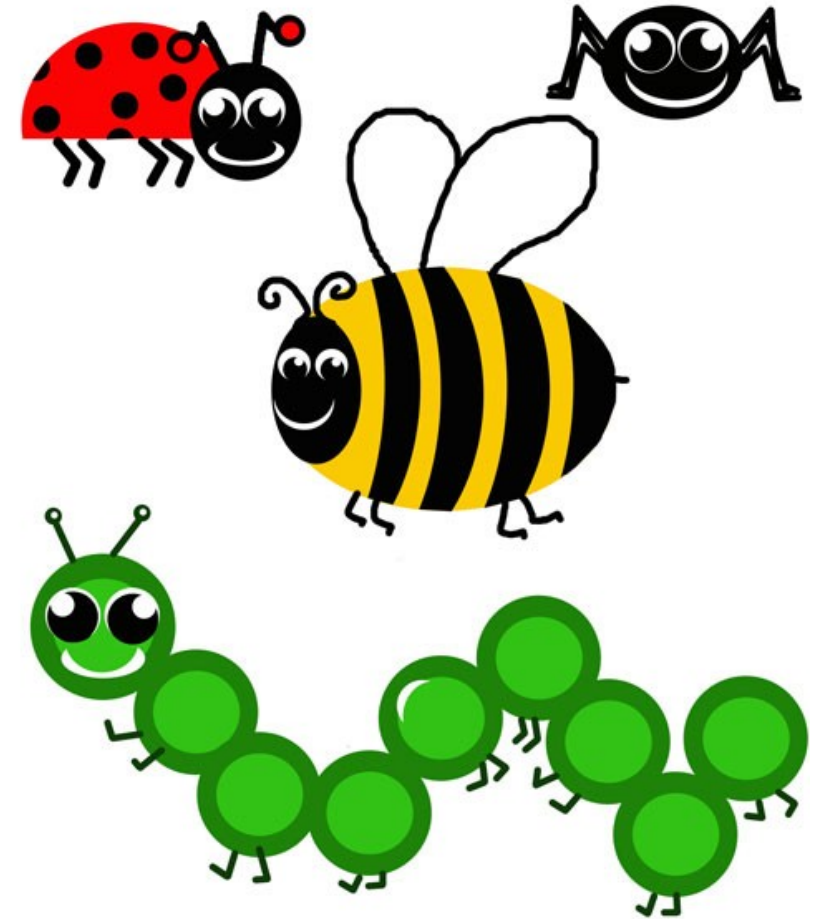

- Assigns a value to a variable during runtime

WHAT ARE BUGS?

ANSWER: BUGS

- Errors in the program

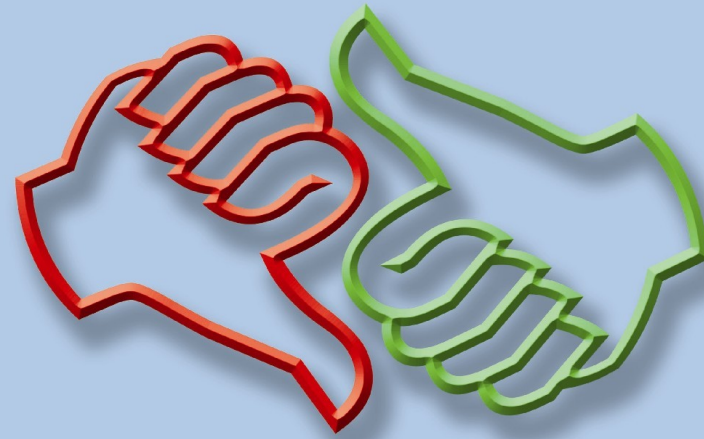

WHAT IS CIN?

ANSWER: CIN

- The standard input stream object in C++
- Tells the computer to paused while the user enters characters at the keyboard and then temporarily stores those characters

WHAT IS A COMMENT?

COMPLAINTS
COMMENTS
COMPLIMENTS

ANSWER: COMMENT

- //
- Used to document a program internally

WHAT IS COUT?

ANSWER: COUT

- Standard output stream object;
- Used with the insertion operator to display information on the screen

WHAT IS DEBUGGING?

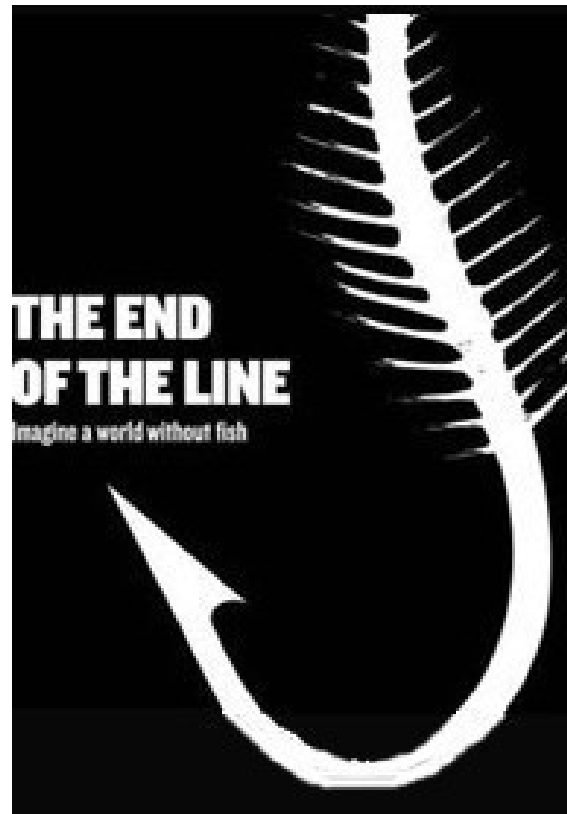

ANSWER: DEBUGGING

- Process of locating and correcting any errors in a program

WHAT IS ENDL?

ANSWER: ENDL

- A stream manipulator; advances the cursor to the next line

WHAT IS AN EXECUTABLE FILE?

ANSWER: EXECUTABLE FILE

- A file that contains all of the machine code necessary to run a program;
- Has a .exe extension

WHAT IS EXPLICIT TYPE CONVERSION?

ANSWER: EXPLICIT TYPE CONVERSION

- When the program specifically commands the conversion of data from one type to another;
- Uses `static_cast`
- Also called a type cast

WHAT IS AN EXTRACTION OPERATOR?

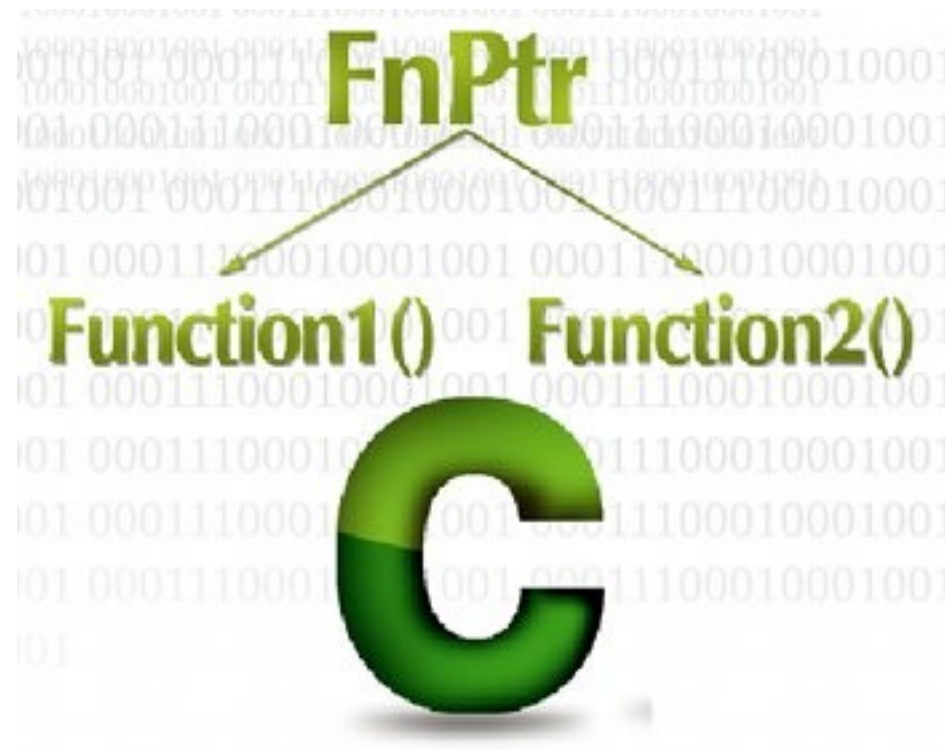

ANSWER: EXTRACTION OPERATOR

- >>

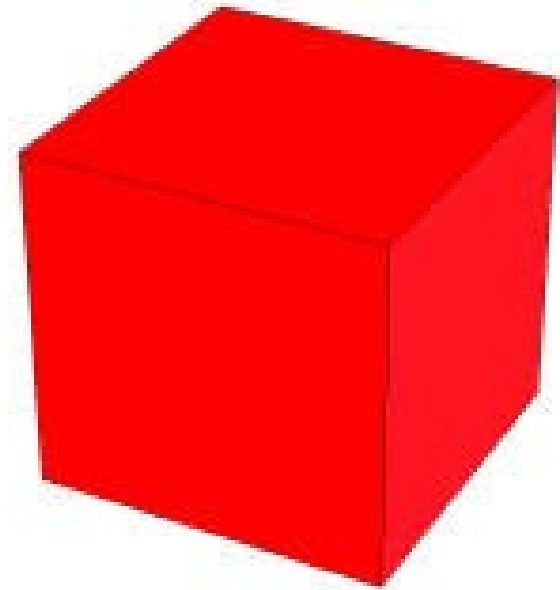

- Removes characters from the cin object and sends them in to the computer's internal memory

WHAT IS A FUNCTION?

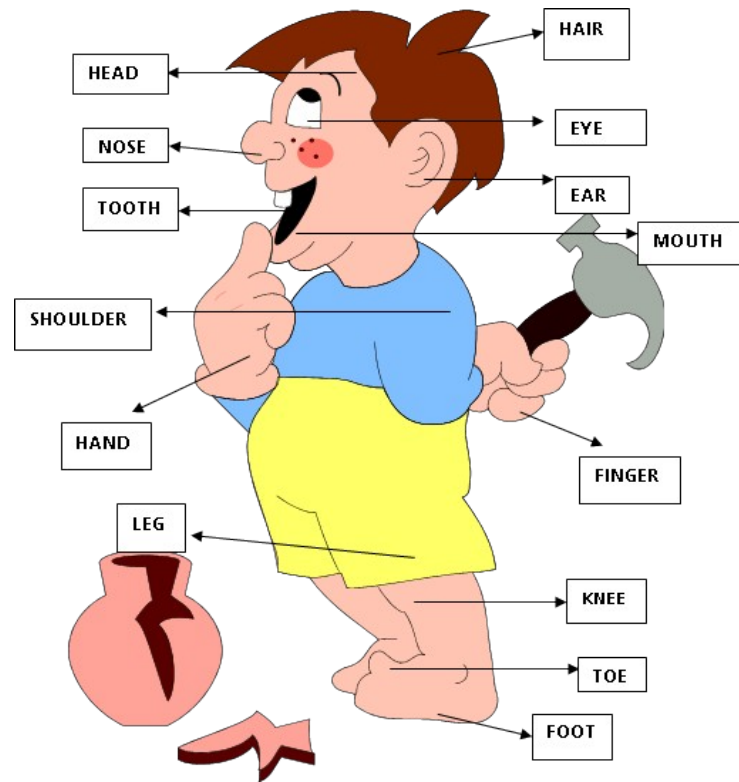

ANSWER: FUNCTION

- A block of code that performs a task

WHAT IS A FUNCTION BODY?

ANSWER: FUNCTION BODY

- Code contained between a function's opening and closing braces `{ }`

WHAT IS A FUNCTION HEADER?

ANSWER: FUNCTION HEADER

- The first line in a function
- Marks the beginning of the function
- Main ()

WHAT IS AN IDE?

ANSWER: IDE

- Integrated development environment
- Visual Studio 2019

WHAT IS AN INSERTION OPERATOR?

ANSWER: INSERTION OPERATOR

- <<

- Used with cout to display information on the screen

WHAT IS AN INTEGRATED DEVELOPMENT ENVIRONMENT?

ANSWER: INTEGRATED DEVELOPMENT ENVIRONMENT

- A system that includes both an editor and a compiler

WHAT IS A LINKER?

ANSWER: LINKER

- A program that combines the code in a C++ program's object file with other machine code needed to run the program

WHAT IS A LOGIC ERROR?

ANSWER: LOGIC ERROR

- An error (bug) that occurs during the runtime of a program that causes bad data

WHAT IS A MODULUS OPERATOR?

%

ANSWER: MODULUS OPERATOR

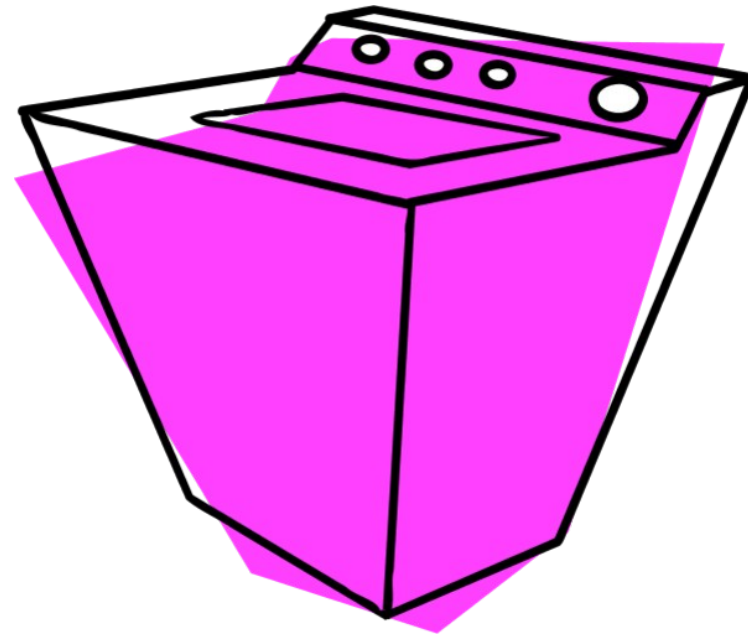

- %
- Returns the remainder after dividing two integers

WHAT IS OBJECT CODE?

ANSWER: OBJECT CODE

- Machine code

WHAT IS A PROMPT?

ANSWER: PROMPT

- A message displayed on the screen indicating the type of data the user should enter

WHAT IS SOURCE CODE?

ANSWER: SOURCE CODE

- The program instructions that you enter using an editor.
- The instructions are saved in a source file.

WHAT IS A SOURCE FILE?

ANSWER: SOURCE FILE

- The file that contains the program's source code
- .cpp

WHAT IS A STATIC_CAST OPERATOR?

ANSWER: STATIC_CAST OPERATOR

- Used to explicitly convert one data type to another
- Type cast

WHAT IS A STREAM?

ANSWER: STREAM

- A sequence of characters

WHAT IS A STREAM MANIPULATOR?

ANSWER: STREAM MANIPULATOR

- Allows a C++ program to manipulate the characters in either the input or the output stream

WHAT ARE STREAM OBJECTS?

ANSWER: STREAM OBJECTS

- Objects used to perform standard input and output operations in C++
- `cin`
- `cout`

WHAT IS A SYNTAX ERROR?

ANSWER: SYNTAX ERROR

- An error that occurs when a program instruction violates a programming languages syntax rules

WHAT IS TYPE CAST?

ANSWER:TYPE CAST

- Explicit type conversion

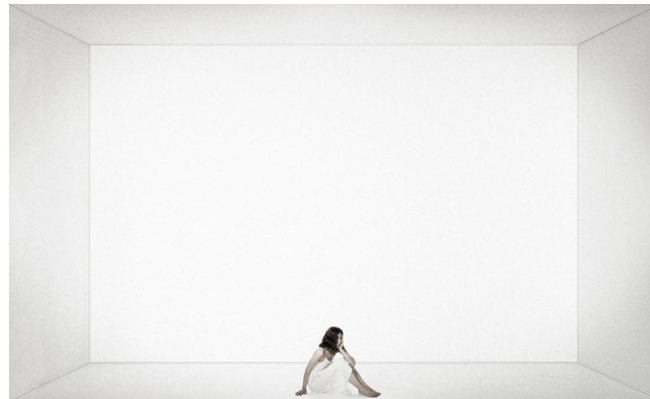

WHAT IS THE USING DIRECTIVE?

- Using namespace std;

ANSWER: USING DIRECTIVE

- An instruction that tells the computer where it can find the definitions of keywords and classes

WHAT IS A WHITE SPACE CHARACTER?

ANSWER: WHITE SPACE CHARACTER

- A newline character
- A tab character
- A blank space character
