

Online Self-learning 2

In this week, the content is still about Network Layer. We covered some basic knowledge on routing in the previous class. Continually, some other functionalities and services would be discussed, which are Congestion Control, QoS and Internetworking. Please follow the above instructions and finish Part 1 & 2. After that, you still have some questions to answer which is posted in another file.

The due to those questions is on October 10, 2019.

Part 1 Reading materials

Textbook Chapter 5

- Intensively reading
 - Section 5.3 – Pay attention to 5.3.2 and 5.3.3
 - Section 5.4 – Focus on 5.4.2 leaky and token buckets; 5.4.3 packet scheduling
 - Section 5.5 – Carefully read 5.5.5 packet fragmentation
- For other contents that I did not specify, you had better roughly read so that you can have a basic understanding on this week's topic.

Part 2 Video links

- Please watch video via this link below which is about Congestion Control, leaky and token buckets algorithms.
