Ross

Scenario

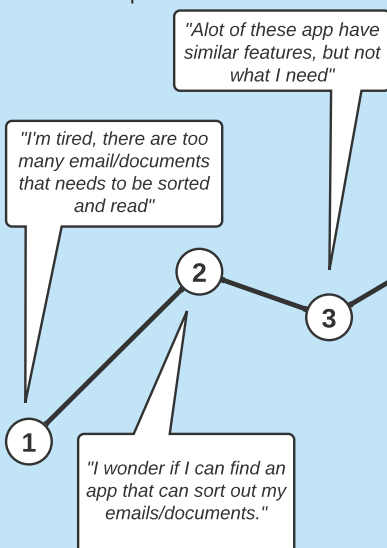

Ross is a Business Admin Department Manager in charge of multiple business projects and is struggling with keeping track of emails/documents and struggles with finding needed documents.

Expectations

- Able to sort and organize emails/document into multiple categories
- Can easily find and retrieve email/document when needed
- Notify if there is an important email/document that needs to be reviewed

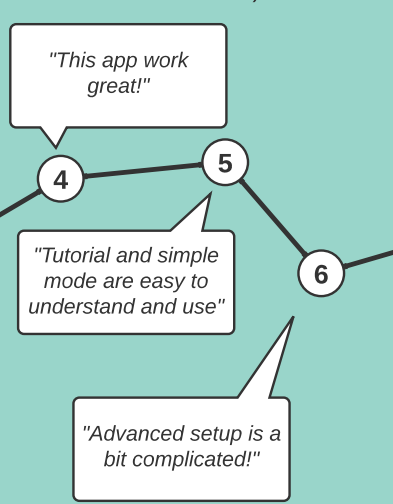

Research

1. Receives multiple emails and documents from multiple projects
2. Decides to search online for a way to organize and sort his work emails and documents
3. Compares a lot of document apps and learns about Doccer - a scanning doc app that seems to have multiple features

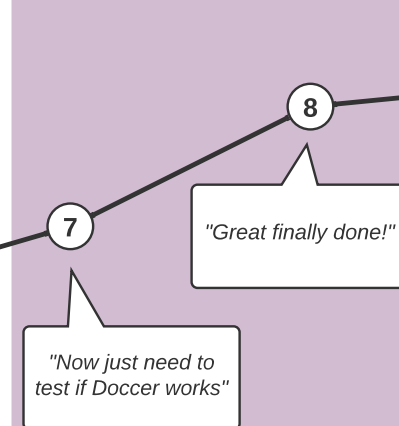

Setup

4. Download and install Doccer
5. Opens Doccer app, goes through learning tutorial and then decides advanced mode fits best for his needs.
6. Start advanced mode and setups multiple features and access settings (sort and categorize feature and text summary feature with email and folder scan extension)

Test

7. Testing advanced mode of Doccer by sending test email and document to see if auto sort and categorizations feature is working
8. Confirms Doccer is working without any issues

Usage Afterwards

9. Uses Doccer for a week
10. Leaves positive Feedback/Review for Doccer app
