Ethics and Proposal Preparation

Professor Rudd - jrudd@uncc.edu; Txt: 704-965-1075
Powerpoint file name: 4155 Week 2

Our Teaching Assistants:

	Name(s)	Class	Email(s)	TA Hours
Vishnu Manoj  	Vishnu Vardhan Darimidi Manoj Kumar Reddy Janapala	ITSC 4155-001 10:15 – 1:00	vdarimid@uncc.edu mjanapal@uncc.edu	Vishnu: Wednesday - 11:00AM to 1:00PM Manoj: Thursday - 12:00PM to 2:00PM
Sai Sai  	Sai Kumar Reddy Bommareddy Sai Tharun Reddy Rupireddy	ITSC 4155-052 2:30 – 5:15	sbommar1@uncc.e du srupired@uncc.edu	Sai: Thursday - 10:00AM to 12:00PM Tharun: Wednesday - 2:30PM to 4:30PM
	Srikar Chamarthy	ITSC 4155-090 5:30 – 8:15	schamar1@uncc.ed u	Srikar: Tuesday - 11:00AM to 1:00PM

Today's Agenda

- Goals for Today

- Any questions from last week?
- Additional Proposal Ideas from Rick Hudson
- Presentation on Ethics and Project Proposals
- Lab - Begin work on Project Proposals and Presentations (Presentations to be due next Friday)

- Goals for Next Week

- Assignments:
 - Present Project Proposals (Friday) Put a copy on Canvas prior to your talk.
 - Rest of class provides feedback on each proposal

4155 Week by Week Glance (subject to change)

- ✓ Course Intro (Week 1)
- ✓ Ethics and Proposal Prep (Week 2)
- Agile Inception Presentations (Week 3)
- Communications, Intro to Agile, User Stories (Week 4+5)
- User Stories and Prototyping (Week 6)
- Prototyping Lab (Week 7)
- Sprint 1 Playback (Week 8)
- Fall Break
- Change Management / Estimating User Stories (Week 9)
- Architectural Patterns (Week 10)
- UML Diagramming (Week 11)
- Sprint 2 Playback (Week 12)
- Design Documentation (Week 13)
- Elevator Speeches and Posters (Week 14)
- Sprint 3 Playback (Week 15)
- FINALS

Ethics 101

Wells Fargo disciplines employees over expense report violations

Wells Fargo Fires Bankers Amid Probe of Dinner Receipts That Were Allegedly Doctored

More than a dozen employees have left Wells Fargo during expenses investigation

By *Peter Rudegeair, Emily Glazer and Coulter Jones*

Updated Aug. 30, 2018 3:25 p.m. ET

Wells Fargo & Co. has fired or suspended more than a dozen employees in its investment bank and is investigating dozens of others over alleged violations of the company's expense policy regarding after-hours meals, according to people familiar with the matter.

At issue is whether Wells Fargo employees ranging from analysts to managing directors in New York, San Francisco and Charlotte, N.C., doctored receipts on dinners that they charged to the bank, the people said.

- Meghan - Likes to throw people under the bus

So what did we just learn?

Don't be Unethical

Project Ideas

(you can propose anything you want, but here is some inspiration)

A few projects from last year

- **NPC generator** - Provides tools for procedurally generated cities, towns, NPC generator, relationship mapping, saving what you generate, and dungeons. Does not generate campaigns (scope), and APIs for other games.
- **Hidden Gems** - Tourist helper application
- **Wut2Eat** - provides recipes for what you have readily available.
- **iWallet** - Will put every card (NFC or RFID) into an Apple Pay-like wallet.
- **Task Force 49** - A website that visualizes things such as beer fests and put it into context of other city stats such as crime, traffic, real estate
- **Visualizations of data bases** - Many examples

Data Sets to Mine for Understanding and Solving Problems

Publicly API accessible data sets are a great place to start thinking about understanding how these data might help solve a vexing problem

- Datasets for Data Science Projects (Federal Government)
- The U.S. General Services Administration publishes an extensive collection of datasets obtained from various government agencies.
-

You can access these datasets at:

- <http://catalog.data.gov/dataset>

I typed in "crime" and found these datasets. Lots of different subject areas and opportunity for project ideas (besides crime)

The screenshot shows the Data.gov website interface. At the top, there is a search bar with the text "Search Data.Gov" and a magnifying glass icon. Below the search bar, the "DATA.GOV" logo is visible, followed by navigation links: DATA, TOPICS, RESOURCES, STRATEGY, DEVELOPERS, and CONTACT. A blue banner below the navigation links contains the text "DATA CATALOG" and a breadcrumb trail: "/ Datasets Organizations".

The main content area shows search results for the term "crime". A search bar on the left contains the text "crime". To the right of the search bar, there is a dropdown menu labeled "Order by:" with the option "Popular" selected. Below the search bar, there is a section for "Formats:" with a button labeled "EXCEL". Below this, a message states: "You are searching in the list of datasets. Show results in entire Data.gov site."

On the left side of the main content area, there is a "Filter by location" section. It includes a "Clear" button, a text input field labeled "Enter location...", and a map of the United States. Below the map, there is a "Topics" section with a dropdown menu showing "Local Government" with a count of 3. Below this, there is a "Topic Categories" section with a message: "There are no Topic Categories that match this search". Below this, there is a "Dataset Type" section with a message: "There are no Dataset Type that match this search".

The main content area displays 8 datasets found for "crime". The first two datasets are titled "Violent Crime Rate" and are for the "State of California". Each dataset description states: "This table contains data on the rate of violent crime (crimes per 1,000 population) for California, its regions, counties, cities and towns. Crime and population data...". Each dataset has download buttons for PDF, XLS, and ZIP. The third dataset is titled "Forensic vs. Civil Commitment Population" and is for the "State of California". Its description states: "This data set shows the count of patients committed to the California State Hospitals during fiscal years 2007-2020. The Department of State Hospitals (DSH)...". It has download buttons for CSV, PDF, XLS, and ZIP. The fourth dataset is titled "Washington State Uniform Crime Reporting - National Incident Based Reporting System" and is for the "State of Washington". Its description states: "Summary Reporting System (SRS) and the National Incident-Based Reporting System (NIBRS) are part of the FBI's Uniform Crime Reporting system. SRS and NIBRS collect...". It has a download button for XLS.

Publicly API accessible data sets are a great place to start thinking about understanding how these data might help solve a vexing problem

- **City of Charlotte Open Data Portal**

This is your resource to explore, visualize and download publicly available data. Here, you can search for data, learn about the City's projects and resources, download data for your own use or create brand new maps and apps. The City of Charlotte is a great place to live, work and play; find out why by exploring the site!

- You can access these datasets at:

<https://data.charlottenc.gov/>

Proposal Development (35 points)

Project Proposal Considerations

1. Establish project scope (What's in, what's out, what's maybe in)
2. Draft a set of required resources (Who is working on what? SW? HW?)
 - Determine required human resources.
 - Define software resources.
 - Determine hardware needs as applicable
3. Identify possible risks
4. The question you need to answer during this initial assessment:

Can it be done by the team in the time available?

Requirements for Assignment

This requires a presentation (next Friday). The presentation should take 10 minutes max.

- A. It will consist of: PowerPoint charts that communicate
 1. Group number and name
 2. Project title (can be a catchy name that you come up with, or a simple descriptive phrase)
 3. List of team members - Identify roles to the extent possible. Ideally, identify at least the Scrum Master (or Project Manager)
 4. You MUST have a designated note taker.
 5. Page numbers

Requirements for Assignment

B. Project Description

1. A clear and concise description of the problem that you are attempting to address
2. A clear and concise description of how your proposed software system will address the problem.
 - a. You don't need to give technical details about how the system would be designed or built (in other words, you don't need to tell us that there is a database or what programming language you will use).
 - b. Think of this as a marketing pitch that describes software features that solve the problem that you've identified.
3. A list that identifies and describes stakeholders that have some interest in such a system (you should particularly identify who would use and or buy such a system)

Requirements for Assignment

- C. Potential features the project might include (e.g., Voice recording, image uploading, blog, ratings, rankings, social media)
- D. Describe how it might be used by stakeholders and end users.
- E. Market research
 - Has anyone else did it? What did you like about it? What was bad about it? How could you make your app or website better?
- F. Potential Risks
 - A list of risks and a short description which might negatively impact your project (e.g., team may have little knowledge of a particular API or IDE.)
- G. For the 10:10 class, you will present live. For the 2:30 and 5:30 classes, you should plan on creating a video of your presentation to be shared over Zoom. You can use the Zoom cast as your pitch in class or do it live over Zoom, your choice. For all groups, submit slides

Please none of these!

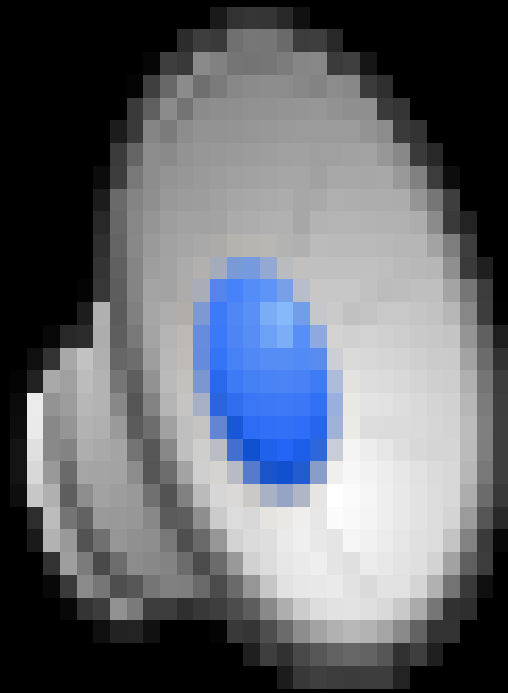

- Exercise app ok as long as it talks to a smart watch or Fitbit, etc

Project Proposals that got
good scores rom previous
semesters

Example 1 - Team Fitness

Example 2 - Safety Ride

Example 3 - Discord Integrator

Lab Time!

- Find your group under the Peoples > Project Groups tab.

Finish building your teams if not already done. Your TA will lead this.

- Get together with your teammates
- Discuss potential project ideas, pick one
- Use the time to build your Inception Proposal (using Proposal Requirements charts in this PPT as your guide of what should be included)
